

## Installation instructions

### Mercedes Benz E Class Coupe c207

Gasoline and Diesel  
from Model Year 2009  
Left-hand drive vehicle  
Not for E 63 AMG  
AMG Optic package not checked  
Blue Efficiency

#### **WARNING!**

Hazard warning:

Incorrect installation or repair of Webasto heating systems may cause a fire or result in the emission of carbon monoxide, which can be fatal. Serious or fatal injuries can be caused as a result.

Specialist company training, technical documentation, specialised tools and equipment are required to install and repair Webasto heating and cooling systems. Only original Webasto parts must be used. For this, also see the catalog of air and water heater accessories from Webasto.

**NEVER attempt to install or repair Webasto heating or cooling systems if you have not successfully completed the company training and thereby acquired the required technical skills, or if you do not have access to the required technical documentation, tools and equipment needed to carry out correct installation and repairs.**

ALWAYS follow all Webasto installation and repair instructions and observe all warnings.

Webasto does not accept any liability for defects and damage that are attributable to installation by untrained staff.

1	LU TT-V Mercedes Benz E Class BR 212 / 207 Gasoline with Telestart T91	1315111B

or

Quantity	Description	Order No.:
1	LU TT-V Mercedes Benz E Class BR 212 / 207 Diesel with Telestart T91	1315069B

**Optional heater control either:**

Quantity	Description	Order No.:
1	1533 Digital timer only in conjunction with Y-adapter	9005753C
		9001505A
1	Thermo Call Comfort/Connect/Locate	See price list

**The installation location of the digital timer/push button should be confirmed with the end customer before installation.**

**Foreword**

This installation instructions applies to vehicles Mercedes Benz E Class C207 Gasoline and Diesel from model year 2009 and later - for validity, see page 2 - assuming technical modifications to the vehicle do not affect installation, any liability claims excluded. Vehicle and engine types, equipment variants and national specifications not listed in these installation instructions have not been tested. The installation must be undertaken according to these "installation instructions" - modifications are not allowed.

The corresponding rules of technology and any information from the vehicle manufacturer should be observed during the installation work.

However, where this is the case the stipulations in this "installation instructions" and "operating instructions" for the *Thermo Top V* should be observed.

The additional ventilation function is not possible!

**General Instructions**

Installation should be carried out according to the general, standard rules of technology. Unless specified otherwise, fasten hoses, lines and wiring harnesses to original vehicle lines and wiring harnesses using cable ties.

Sharp edges should be fitted with edge protectors (split-open plastic hose).

Spray unfinished body areas, e.g. drilled holes, with anti-corrosion wax (Tectyl 100K, Order No. 111329).

**Special Tools**

- Torque wrench for 2.0 - 10 Nm
- Hose clamping pliers
- Stepped drill

## Explanatory Notes on Document

To provide you with a quick overview of the individual working steps, you will find an identification mark on the outside top right corner of the page in question.

### Mechanical system

### Electrical system

### Water

### Fuel

### Exhaust gas

### Combustion air

### Software

Special features are highlighted using the following symbols:

Specific risk of injury or fatal accidents.

Specific risk of damage to components.

Specific risk of fire or explosion.

Reference to these, the general installation instructions of the Webasto operating elements and to vehicle-specific documents of the manufacturer

Reference to a special technical feature.

The arrow in the vehicle icon indicates the position on the vehicle and the viewing angle.

**All dimensions are in mm! Install fuel connections without any collisions!**  
**Starting torque of 5x13 heater unit bolts = 8Nm!**  
**Starting torque of 5x15 bolts of water branch retaining plate = 8Nm!**

## Preliminary Work

### WARNING!

- Open the fuel tank cap, ventilate the tank.
- Close the tank cap again.
- Disconnect the battery "earth" or "ground" connection.
- Depressurize the cooling system.
- Copy the factory number from the original type label to the duplicate type label.
- Remove years that do not apply from the duplicate label.
- Attach the duplicate label (type label) in the appropriate place.
- Remove the trim of the passenger compartment fan air intake
- Remove the windshield wipers.
- Remove the coolant reservoir cap.
- Remove the dome strut on the left.
- Remove windshield wiper motor fully
- Remove the cover of the air intake for the passenger compartment fan in the engine compartment on the right.
- Remove battery with carrier fully
- Remove battery control unit
- Remove the engine design cover.
- Remove air intake pipe (right)
- Remove the lower engine cover.
- Remove the lower vehicle trim (right)
- Remove the right-hand front wheel.
- Remove the wheel well trim (right)
- Remove the seat bench of the rear bench seat.
- Remove the fuel-tank sending unit in accordance with the manufacturers specifications (right)
- Remove cover below the glove compartment
- Remove the door sill panel trim at the front right
- Remove lower A Column trim at front right
- Fold back the cover in the foot well on the co-driver side, remove cover plate (plastic nuts) and turn to the rear.
- Remove front air-conditioning control panel
- Remove shift lever cover or storage compartment in the 7-gear automatic transmission box
- Remove the ashtray or storage compartment with the socket outlet below the A/C control panel.
- Discharge engine coolant according to manufacturer's specification

### Heater installation location

1 Heater

Installation location

**Preparing electrical system**

**Preparing PC wiring harness**

Remove red (R) wire 1 from socket 15 PC (if available).

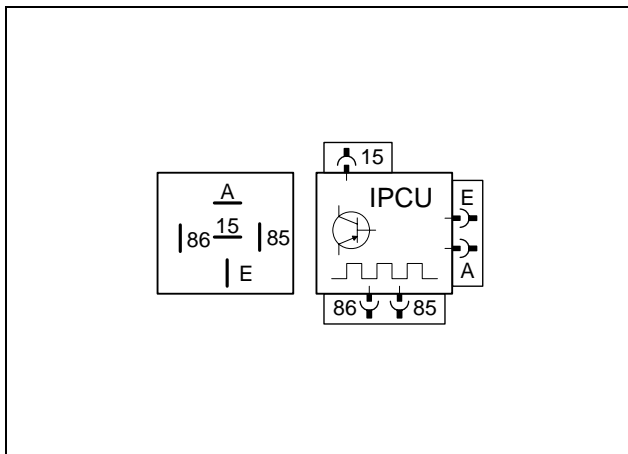

**Remove wire from terminal 15 IPCU**

Insulate and tie back red (R) wire 1.

Red (rt) wire 1 secured with insulation tape to wiring harness of IPCU 2!

IPCUC view on contact side!

Duty cycle: 56%  
 Frequency: 400Hz  
 Voltage: 3.0V  
 Function: High-side

**IPCUC**

**Electrical system**

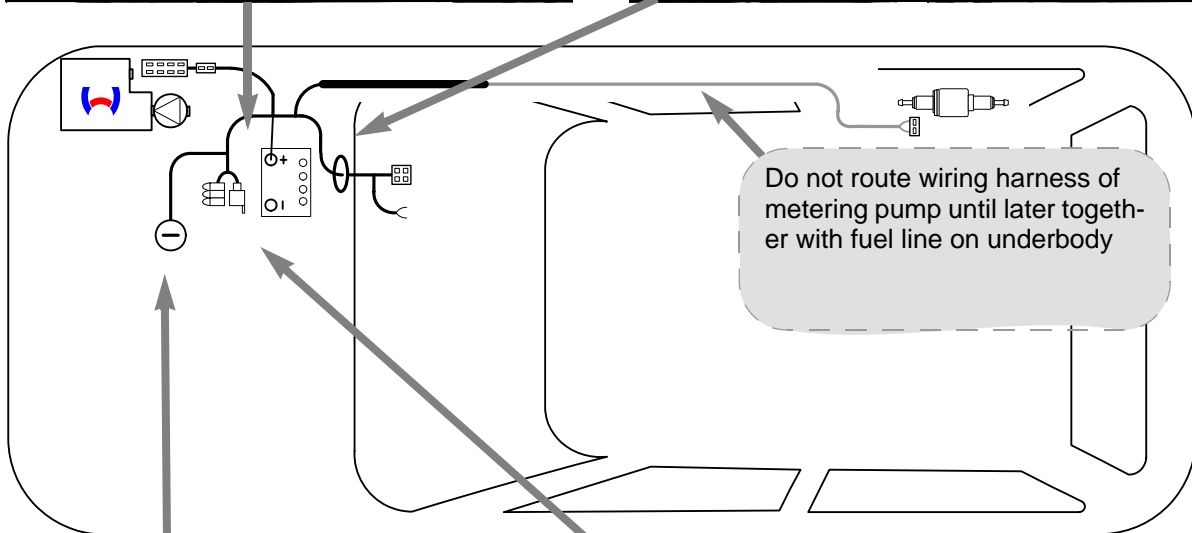

**Plus wire**

- 1 Positive wire on positive terminal of battery

**Wiring harness pass through**

- 1 Wiring harness of heater control, wiring harness of fan controller relay K3
- 2 Protective rubber plug

**Ground wire**

- 1 Ground wire
- 2 Original vehicle ground support point

**Fuse holder, K3 relay**

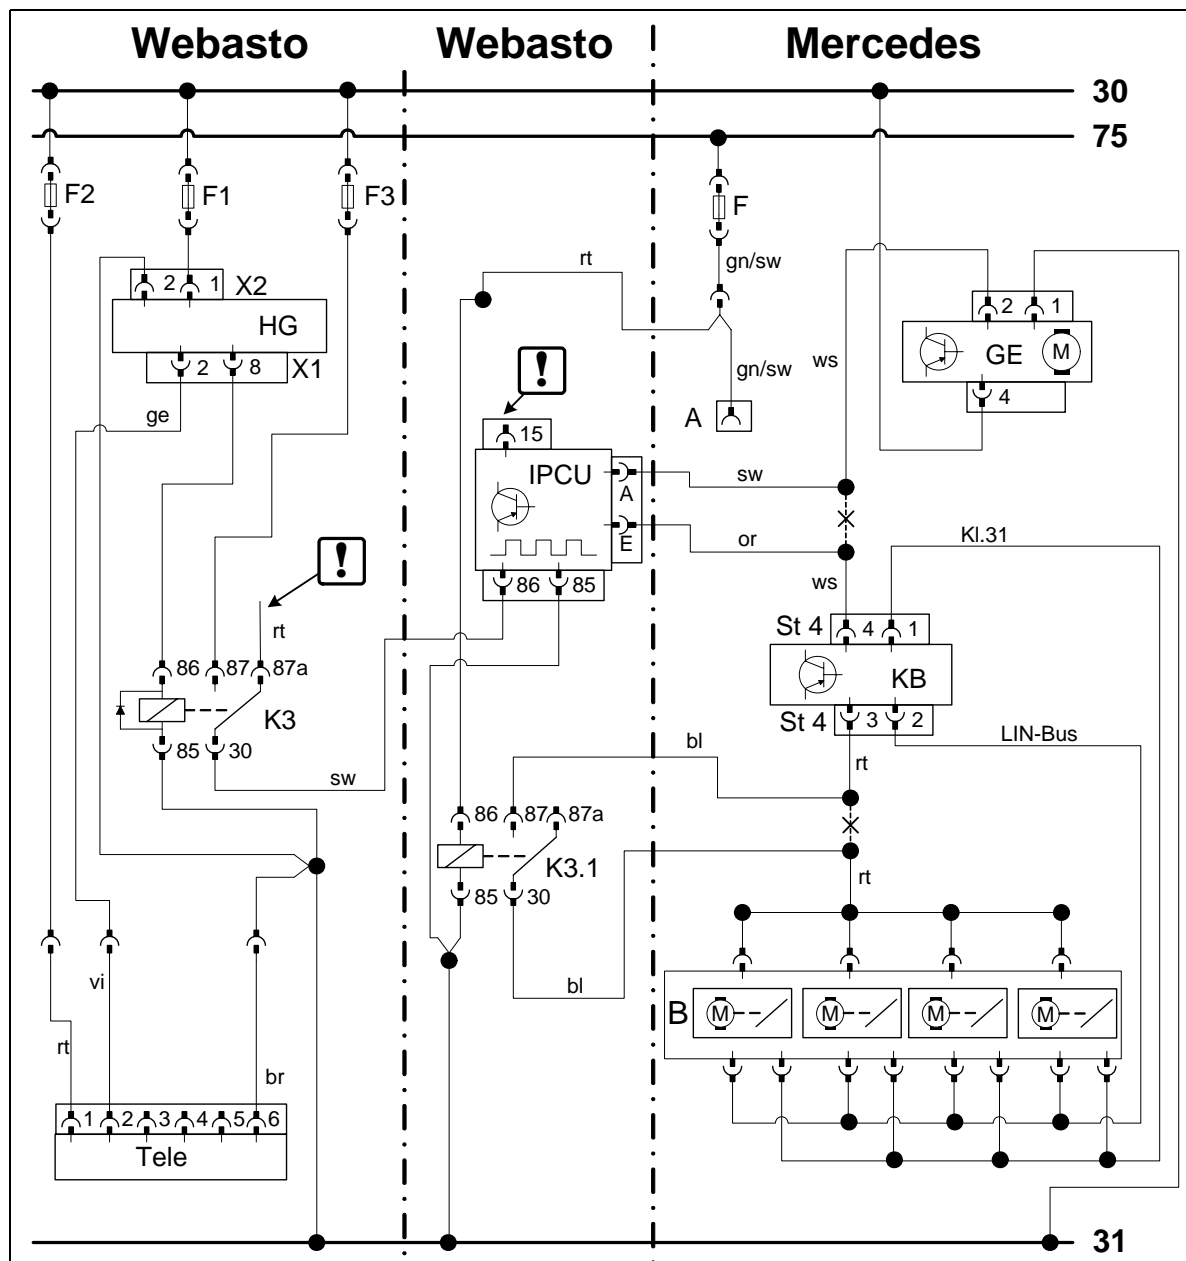

- 1 Remove clip
- 2 Mount angle bracket, MD bolt, large diameter washer, flanged nut loosely
- 3 MD bolt, washer, retaining plate of fuse holder, KS relay, MD nut
- 4 Fuse carrier

**Wiring harness installation diagram**

- 4** Green/black (gr/sw) wire

**Connection to socket outlet/lighter**

## Heater controls

### Telestart and push button combination

Mount yellow (ge) wire 2 in free socket of 4-pin connector 1 of heater-unit wiring harness 3.

Preparing wiring harness of heater

Move violet (vi) wire 2 from socket 5 to socket 2 in 6-pin connector of Telestart 1.

Preparing Telestart connector

Diagram of standard heater controls

Combination of digital timer, Telestart and/or Thermo Call with push button

Mount yellow (ge) wire 2 in free socket of 4-pin connector 1 of heater-unit wiring harness 3.

Preparing wiring harness of heater

Move black (vi) wire 2 from socket 3 to socket 2 in 6-pin connector of Telestart 1.

Remove violet (vi) wire 4 from socket 1 from 4-pin connector housing 3, insulate and tie back.

Remove black (sw) wire 5 from socket 2 and insert in socket 1.

Preparing adapter wiring harness (67089A)

Selection of individual heater controls can be combined with each other!

**WARNING:**

1 Insert yellow (ge) wire in free socket

Diagram of optional heater controls

**Push button installation**

1 Cover

Removing cover

Mount cap nut 1 of push button, align in centre and drill 16mm dia hole 2 in the cover (step drill)!

Hole in cover

Install push button 1, align and secure it with cap nut!

Installing push button

When drilling, watch components located behind.

1 12 mm dia hole

Hole for wiring harness

1 Cover

Mounting cover

**Telestart**

1 Receiver, adhesive tape

Installing receiver

1 Antenna

Installing antenna

**Preparing installation location**

Remove horn 1 with bracket. Bolt will be re-used!

**Removing horn**

Detaching bracket 1. Bolts will be reused!

**Detaching bracket**

Bend back tab (twist protection) 1 of bracket 2!

**Preparing bracket**

- 1 Horn
- 2 Angle bracket
- 3 Original vehicle bolt, flanged nut

**Preparing horn**

1 9.1 mm dia. hole, rivet nut

Installing rivet nut

Mount angle bracket 4 between bracket 3 and cross member. Reroute LED TFL wiring harness and secure with cable tie!

- 1 Original vehicle bolt
- 2 Mount original vehicle bolt loosely

Installing bracket, horn

Mount heater bracket 3 with oblong hole between bracket 2 and bumper at position 1.

Mounting heater

Mount heater bracket 4 with oblong hole between bracket and bumper (see previous figure). Mount heater at position 5 loosely!

- 1 Angle bracket
- 2 M6x20 bolt, flanged nut
- 3 Copy hole pattern
- 5 M6x20 bolt, large diameter washer

Copying hole pattern

Bend heater bracket 1 according to figure. Check the distances.

**Bending bracket**

Removing heater.

1 7 mm dia hole, M6x20 nut, pin lock

**Hole in bumper**

**Installing heater**

Mount heater bracket with oblong hole between bracket and bumper and align (see previous workstep). Tighten bolt at position 1.

2 Flanged nut

**Installing heater**

1 M6x20 bolt, large diameter washer

**Installing heater**

**Coolant circuit**  
**With available electr. circulating pump**

**WARNING!**

Any coolant running off should be collected using an appropriate container! Install hoses so that they are kink-free. Unless specified otherwise, always fasten using cable ties. Position clamps so that no other hose can be damaged! When installing the hoses, the heater must be filled with coolant. The connection should be based on the following diagram:

Coolant routing diagram

All spring clips without a specific designation  = 25 mm dia. 1= Original vehicle circulating pump  Black (sw) rubber isolator. Connecting pipe  = 18x20 dia. 3 = check valve.  4= 90° T-piece 

Hose **D** = 180° moulded hose (18 mm dia)  
Discard **X** section

- A** = 1330 (Ø 18)
- B** = 500 (Ø 18)
- C** = 490 (Ø 20)
- E** = 200 (Ø 18)

**Cutting coolant hoses to length**

Push braided protection hoses on to hoses **A**, **B** and **C** and cut to size!

**1** Shrink hose [6x]

**Preparing coolant hose**

Loosen battery control unit **1**.

- 2** Remove supply line
- 3** Remove flanged nut

**Preparing routing in engine compartment**

Remove Cover **1**; will not be reused.

**Removing cover**

1 Execution for Hose A

Preparing routing in engine compartment

Cut out 15 mm from original vehicle hose at Position 3 !

- 1 Hose section on heat exchange outlet
- 2 Hose section on circulating pump inlet / engine inlet

Cutting point

1 T-piece, 3x18mm dia

Installing T-piece

Mount Hose bracket 3 between hose E and original vehicle hose from expansion tank!

- 1 T-piece
- 2 Heater coolant inlet

Connecting Hose E to heater

Remove original vehicle hose 1.

Cutting point

Watch flow direction from check valve 2.

- 1 Connection on heat exchanger inlet
- 3 Connection for Hose A
- 4 Connection on quick coupling engine outlet

Pre-installing check valve

Mount Hose A on check valve 1.

Pre-installing check valve

Mount battery carrier 1 and install edge protection 2.

Installing battery carrier

1 4.5 mm dia. hole

Installing battery carrier

Rout hose **B** and **C** to cutting point. Route Hose **A** in the engine compartment (see following figure)!  
Install rubber-coated pipe clamp of 35 mm dia **2** on check valve **1** loosely!

Positioning hose group

1 Pass through to engine compartment

Routing Hose A

1 Quick coupling

Connecting engine outlet

1 Connection piece on heat exchanger inlet

Connect-  
ing heat  
exchanger  
inlet

Route Hose A to heater!

- 1 Hose bracket, can be locked [2x]
- 2 Align black (sw) rubber isolator
- 3 Hose bracket

Routing  
Hose A

1 Connecting piece of heater coolant outlet

Connect-  
ing Hose A  
to heater

Aligning hoses. Ensure sufficient distance to neighbouring components, correct if necessary.

- 1 Check valve.
- 2 5.5x13 self-tapping screw
- 3 34 mm dia. rubber-coated p-clamp

Installing  
check  
valve

## Coolant circuit Without available electr. circulating pump

### WARNING!

Any coolant running off should be collected using an appropriate container! Install hoses so that they are kink-free. Unless specified otherwise, always fasten using cable ties. Position clamps so that no other hose can be damaged! When installing the hoses, the heater must be filled with coolant. The connection should be based on the following diagram:

Coolant routing diagram

All spring clips without a specific designation  = 25 mm dia.  Black (sw) rubber isolator. Connecting pipe  = 18x20 dia. 1 = check valve. 2 = 90° T-piece 

Hose **D** = 180° moulded hose (18 mm dia)  
Discard **X** section

- A** = 1330 (Ø 18)
- B** = 500 (Ø 18)
- C** = 490 (Ø 20)
- E** = 200 (Ø 18)

**Cutting coolant hoses to length**

Push braided protection hoses on to hoses **A**, **B** and **C** and cut to size!

**1** Shrink hose [6x]

**Preparing coolant hose**

Loosen battery control unit **1**.

- 2** Remove supply line
- 3** Remove flanged nut

**Preparing routing in engine compartment**

Remove Cover **1**; will not be reused.

**Removing cover**

1 Execution for Hose A

Preparing routing in engine compartment

Cut out 15 mm from original vehicle hose at Position 3 !

- 1 Hose section on heat exchange outlet
- 2 Hose section of engine inlet

Cutting point

1 T-piece, 3x18mm dia

Installing T-piece

- 1 Heater coolant inlet
- 2 T-piece

Connecting Hose E to heater

Remove original vehicle hose 1.

Cutting point

Watch flow direction from check valve 2.

- 1 Connection on heat exchanger inlet
- 3 Connection for Hose A
- 4 Connection on quick coupling engine outlet

Pre-installing check valve

Mount Hose A on check valve 1.

Pre-installing check valve

Mount battery carrier 1 and install edge protection 2.

Installing battery carrier

1 4.5 mm dia. hole

Installing battery carrier

Rout hose **B** and **C** to cutting point. Route Hose **A** in the engine compartment (see following figure)!  
Install rubber-coated pipe clamp of 35 mm dia **2** on check valve **1** loosely!

Positioning hose group

1 Pass through to engine compartment

Routing Hose A

1 Quick coupling

Connecting engine outlet

1 Connection piece on heat exchanger inlet

Connect-  
ing heat  
exchanger  
inlet

Route Hose A to heater!

- 1 Align black (sw) rubber isolator
- 2 Hose bracket, can be locked [2x]

Routing  
Hose A

1 Connecting piece of heater coolant outlet

Connect-  
ing Hose A  
to heater

Aligning hoses. Ensure sufficient distance to neighbouring components, correct if necessary.

- 1 Check valve.
- 2 5.5x13 self-tapping screw
- 3 34 mm dia. rubber-coated p-clamp

Installing  
check  
valve

**Exhaust gas**

Shape exhaust line 1 according to figure and position hose clamps 2 [2x] loosely!

**Preparing exhaust pipe**

- 1 Exhaust pipe
- 2 Tighten hose clamp

**Installing exhaust pipe**

Ensure sufficient distance to neighbouring components, correct if necessary.

- 1 Tighten hose clamp
- 2 Exhaust muffer
- 3 M6x12 bolt, spring lockwasher

**Installing muffer**

Cut tab 1 off exhaust end section 3.

- 2 Cutting point

**Preparing exhaust end section**

- 1 Muffler
- 2 Hose clamp
- 3 Exhaust end section

**Installing  
exhaust  
end sec-  
tion**

**Fuel**

**CAUTION!**

Open the vehicle's fuel tank cap, ventilate the tank and then re-close the tank lock.

Catch any fuel running off with an appropriate container.

Install fuel line and metering-pump wiring harness so that they are protected against stone impact. Unless specified otherwise, always fasten using cable ties. Mount the fuel line and wiring harness with rub protection on sharp edges.

**WARNING!**

The fuel line and wiring harness are routed to the metering pump in as shown in the wiring harness routing diagram.

**All vehicles**

Pin out connector housing of metering-pump wiring harness before pulling into corrugated tube.

- 1 9 mm dia. corrugated tube, wiring harness of metering pump
- 2 Cloth protection hose
- 3 Fuel line, 10 mm dia. clamp
- 4 Moulded hose of heater

**Connection to heater**

Degrease adhesive surface for adhesive base 1.

- 1 Adhesive base, cable tie
- 2 Corrugated tube

**Installing lines**

Degrease adhesive surface for adhesive base 1.

- 1 Adhesive base, cable tie
- 2 Corrugated tube

**Installing lines**

Degrease adhesive surface for adhesive base 1.

- 1 Adhesive base [2x], cable tie [2x]
- 2 Corrugated tube
- 3 Cable tie, existing hole

**Installing lines**

Degrease adhesive surface for adhesive base 1.

- 1 Adhesive base [2x], cable tie [2x]
- 2 Fuel line, wiring harness of metering pump

**Installing lines**

Distribute retaining clips 1 [6x] evenly along vehicle underbody and insert fuel line and wiring harness of metering pump 2.

**Installing lines**

- 1 Fuel line, wiring harness of metering pump
- 2 hose section 8x12 dia
- 3 Cable tie
- 4 Original vehicle retaining strap

**Installing lines**

1 9.1 mm dia. hole, rivet nut

Installing rivet nut

Mount connector housing of metering pump cable 4 on wiring harness again. Degrease adhesive surface for adhesive base 5.

- 1 M6x25 bolt
- 2 Mount
- 3 Metering pump connector
- 4 90° moulded hose, 10 mm dia. clamp [2x], fuel line
- 5 Adhesive base, cable tie
- 6 Metering pump

Installing metering pump

**Diesel**

Remove fuel-tank sending unit 2 in accordance with manufacturer's specifications. Mount large diameter washer 1 according to figure, copy hole pattern 3 for 6mm dia hole. When drilling, make sure drilling chips do not get into fuel tank or fuel-tank sending unit.

Removing fuel

Cut off standpipe 1 at an angle at position X.

2 Discard section

Cutting standpipe to size

Insert fuel standpipe 1 into fuel-tank sending unit 2.

Installing fuel stand pipe

Observe Torque 5 Nm of the flanged nut 1 from fuel stand pipe 2.

Installing fuel stand pipe

Mount 3.5 mm dia. moulded hose 3 on fuel standpipe 1.

- 2 8 mm dia. clamp
- 4 10 mm dia. clamp
- 5 Standpipe

Installing standpipe

Install fuel-tank sending unit 4 in accordance with manufacturer's specifications. Mount 3.5 mm dia. moulded hose 2 on fuel standpipe 3.

- 1 10 mm dia. clamp, fuel line
- 5 8 mm dia. clamp
- 6 6x11 cloth hose, rattle protection

Installing fuel line

**Gasoline**

Remove fuel-tank sending unit in accordance with manufacturer's instructions.

Remove upper section 1 from lower section 2 in accordance with manufacturer's instructions.

**Removing fuel**

Cut off connection piece 2 flush on underside 1. Drill 6 mm dia. hole in centre.

**Removing fuel**

Insert fuel standpipe 1 in upper section of fuel-tank sending unit 2.

**Removing fuel**

Observe tightening torque 5 Nm of flanged nut 2 on fuel standpipe 1.

**Removing fuel**

Cut standpipe 2 obliquely!

1 Section, discard

Mount standpipe 2 in 4.5 mm dia. moulded hose 4.

3 10 mm dia. clamp

**Cutting to length and pre-mounting stand pipe**

Premount standpipe 3 on fuel standpipe 1 and secure with 8 mm dia. clamp 2.

4 Fuel-tank sending unit

**Installing standpipe**

Install fuel-tank sending unit 1 in accordance with manufacturer's specifications. Insert line holder 3 for guiding standpipe 2 in lower section of fuel-tank sending unit 4.

**Installing standpipe**

Install fuel-tank sending unit 1 in accordance with manufacturer's specifications. Mount 3.5 mm dia. moulded hose 4 on fuel standpipe 2.

3 8 mm dia. clamp

5 10 mm dia. clamp

6 Fuel line

7 6x11 hose (rattle protection)

**Installing line**

## All vehicles

Degrease adhesive surface for adhesive base 3.

- 1 90° moulded hose, 10 mm dia. clamp
- 2 Fuel line
- 3 Cable tie, adhesive base

**Connect-  
ing meter-  
ing pump**

**Combustion air**

Bend perforated bracket 1 2x 90°.

**Bending perforated bracket**

- 1 Cable tie
- 2 Combustion air pipe

**Installing combustion air pipe**

Install perforated bracket 4 with original vehicle bolt 3.

- 1 Muffler
- 2 Combustion air pipe, protection flap
- 5 M5x20 bolt, 48 mm dia clamp, flanged nut

**Installing muffler**

**Final Work**

**WARNING!**

Reassemble the disassembled components in reverse order.  
 Check all hoses, clamps and all electrical connections for firm seating.  
 Secure all loose cables using cable ties.  
 Only use manufacturer-approved coolant.  
 Spray the heater components with anti-corrosion wax (Tectyl 100K, Order No. 111329).

- Connect the battery
- Fill and bleed the coolant circuit according to the vehicle manufacturer's specifications.
- Set the digital timer.
- Define settings of the air-conditioning control panel according to the "Operating Instructions for End Customer".
- Check the proper operation of the parking heater, see the operating instructions/installation instructions.
- Attach the "Switch off parking heater before refueling" sticker to the left-hand B-pillar.

While installing the windshield wiper motor 1 observe the distance from the linkage to the hoses below it!

**Installing windshield wiper engine**

Ensure sufficient distance, especially from hose A!

**Installing battery**

After installing the cover 1, tighten the screw joint of the angle bracket 2 !

**Tightening screw joint of angle bracket**

Drill 45 mm dia. hole 1 in trim 2.

The exhaust end section 3, must be centered relative to the hole 1 and aligned flush with the trim 2; realign exhaust end section 3 if necessary.

3 Exhaust end section

Aligning exhaust end section

1 Exhaust end section

Aligning exhaust end section
