

# K Installation documentation

for water heater Thermo Top Evo

'Island' coolant circuit without engine preheating

BMW 3 Series G20 / G21

Left-hand drive vehicle

| Manufacturer | Model        | Type | Model year | EG-BE-No. / ABE       |
|--------------|--------------|------|------------|-----------------------|
| BMW          | 3 Series G20 | G3L  | from 2019  | e1* 2007/46* 1947*... |
| BMW          | 3 Series G21 | G3K  | from 2019  | e1* 2007/46* 2017*... |

| Motorisation | Fuel   | Emission standard | Transmission type | Output [kW] | Displacement [cm <sup>3</sup> ] | Engine code |
|--------------|--------|-------------------|-------------------|-------------|---------------------------------|-------------|
| 320i         | Petrol | Euro 6d Temp      | AG                | 135         | 1998                            | B48B20      |
| 320d         | Diesel | Euro 6d Temp      | AG                | 140         | 1995                            | B47D20      |

| Validity                    | Equipment variants                | Model              |
|-----------------------------|-----------------------------------|--------------------|
|                             |                                   | 3 Series G20 / G21 |
| Verified equipment variants | 2 zone automatic air-conditioning | x                  |
|                             | LED main headlights               | x                  |
|                             | LED front fog lights              | x                  |
|                             | Keyless Go                        | x                  |

### Note

- In case of vehicles with an installed trailer hitch, with an existing preliminary setup for a trailer hitch or in case of a 'Hot country' model, it may not be possible to carry out the installation as there may already be an additional radiator at the installation location of the heater. Please check this first.

| Total installation time | Note |
|-------------------------|------|
| 9.0 hours               |      |

---

## 2 Installation notes

### 2.1 Information on Validity

This installation documentation applies to vehicles listed on page 1, assuming technical modifications to the vehicle do not affect installation, any liability claims excluded. Depending on the vehicle version and equipment, modifications may be necessary during installation with respect to this installation documentation. Vehicle and engine types, equipment variants and other specifications not listed in this installation documentation have not been tested. However, installation according to this installation documentation may be possible.

### 2.2 Components used

| Designation  | Order number                  |
|--|-------------------------------|
| Basic delivery scope of Thermo Top Evo (see 'Notes on installation')                               | In accordance with price list |
| Installation kit for BMW 3 Series 2019 petrol and diesel   | 1327568A                      |
| Additional 'Webasto Comfort' A/C control kit for BMW X3 / X4 / 3 Series / 5 Series                 | 1326680_                      |
| In case of Telestart, control element, as well as indicator lamp in consultation with end customer | In accordance with price list |

### 2.3 Notes on installation, in coordination with the end customer

- ▶ Arrange for the vehicle to be delivered with the tank only about ¼ full.
- ▶ The installation location of the following elements should be chosen in coordination with the end customer:
  - the push button in case of the Telestart and/or ThermoCall and/or ThermoConnect options
  - the MultiControl CAR option

We recommend:

- installing a Thermo Top Evo 4. The heater is integrated into the coolant circuit as an 'island' and heats up the vehicle passenger compartment. There is no engine pre-heating.
- depending on the space required and the veh. manufacturer's instructions, the use of a vehicle battery with a higher electrical capacity.

### 2.4 Information on Total Installation Time

The total installation time includes the time needed for mounting and demounting the vehicle-specific components, the heater specific installation time and all other times required for the system integration and initial start-up of the heater.

The total installation time may vary for vehicle equipment other than provided.

---

## 3 About this document

### 3.1 Purpose of the document

This installation documentation is part of the product and contains all the information required to ensure professional vehicle specific installation of the:

|                       |
|-----------------------|
| Thermo Top Evo heater |
|-----------------------|

### 3.2 Warranty and liability

Webasto shall assume no liability for defects, damage and injuries resulting from a failure to observe the installation, repair and operating instructions of the information contained in them.

This liability exclusion particularly applies to improper installations and repairs by untrained persons or in the case of a failure to use genuine spare parts.

The liability due to culpable disregard to life, limb or health and due to damage or injuries caused by a wilful or reckless breach of duty remain unaffected, as does the obligatory product liability.

Installation should be carried out according to the general, standard rules of technology. Unless specified otherwise, fasten hoses, lines and wiring harnesses to original vehicle lines and wiring harnesses using cable ties. Insulate loose wire ends and tie back. Connectors on electronic components must audibly snap into place during assembly.

Spray unfinished body areas, e.g. drilled holes, with anti-corrosion wax (Tectyl 100K).

Observe the instructions and guidelines of the respective vehicle manufacturer for demounting and mounting vehicle specific components.

The initial start-up is to be executed with the Webasto Thermo Test Diagnosis.

When installing a programmable control module (e.g. a PWM Gateway), the corresponding settings must be checked or adjusted.

#### 3.2.1 Statutory regulations governing installation

The Thermo Top Evo heater has been type-tested and approved in accordance with ECE-R 10 (EMC) and ECE-R 122 (heater). The regulations of these guidelines are binding in the scope of the Directive 70/156/EEC and/or 2007/46/EC (for new vehicle models from 29/04/2009) and should also be observed in countries in which there are no special regulations.

The heater is licensed in accordance with paragraph 19, section 3, No. 2b of the StVZO (German Road Traffic Licensing Authority).

### 3.3 Safety

#### Qualifications of installation personnel

The installation personnel must have the following qualifications:

- Successful completion of Webasto training
- Corresponding qualification for working on technical systems

#### Regulations and legal requirements

The regulations from the heater's general installation and operating instructions must be observed.

#### 3.3.1 Safety information on installation

##### Danger posed by live parts

- ▶ Prior to installation, disconnect the vehicle from the voltage supply.
- ▶ Make sure the electrical system is earthed correctly.
- ▶ Always comply with legal requirements.
- ▶ Observe data on type label.

##### Danger of fire and leaking toxic gases due to improper installation

- ▶ Vehicle parts in the vicinity of the heater must be protected against excessive heating by the following measures:
  - ⇒ Maintain minimum safety distances.
  - ⇒ Ensure adequate ventilation.
  - ⇒ Use fire-resistant materials or heat shields.

##### Danger due to sharp edges

- Lacerations
- Short circuit due to electrical wire damage
- ▶ Fit protectors on sharp edges.

### 3.4 Using this document

Before installing and operating the heater, read this installation documentation, the installation instructions of the heater, the operating instructions and supplementary sheets provided.

#### 3.4.1 Explanatory Notes on the Document

There is an identification mark near the respective work step to allow you to quickly allocate the other applicable documents to the Webasto components to be installed:

|   |  |
|---|--|
| Generally valid Webasto documentation                             |  |
| Vehicle-specific installation documentation                       |  |
| Vehicle-specific installation documentation of the cold start kit |  |
| Webasto Comfort A/C control                                       |  |
| Webasto Standard A/C control                                      |  |
| Tank extracting device (e.g. FuelFix)                             |  |
| Exhaust end fastener (EFIX)                                       |  |
| Combustion air intake silencer                                    |  |
| Spacer bracket (ASH)  |  |

#### 3.4.2 Use of symbols

#### DANGER

Type and source of the risk

Consequences: Failure to follow the instructions can result in death

► Actions to protect yourself against risks.

#### WARNING

Type and source of the risk

Consequences: Failure to follow the instructions can lead to serious or even fatal injuries

► Actions to protect yourself against risks.

#### CAUTION

Type and source of the risk

Consequences: Failure to follow the instructions can lead to minor injuries

► Actions to protect yourself against risks.

Type and source of the risk

Consequences: Failure to follow the instructions can lead to material damage

► Actions to protect yourself against risks.

Reference to the vehicle manufacturer's specific documents.

Note on a special technical feature

#### 3.4.3 Work step identification marks

The ongoing work step is indicated on the outside top corner of the page:

|                   |                   |              |          |
|-------------------|-------------------|--------------|----------|
| Mechanical system | Electrical system | High-voltage | Coolant  |
|                   |                   |              |          |
| Combustion air    | Fuel              | Exhaust      | Software |
|                   |                   |              |          |

#### 3.4.4 Orientation aid

The arrow indicates the position on the vehicle and the viewing angle

#### 3.4.5 Use of highlighting

| Highlight                        | Explanation  |
|----------------------------------|--|
| ✓                                | Action   |
| ►                                | Necessary action   |
| ⇒                                | Result of an action  |
| <b>1</b> / <b>12</b> / <b>a1</b> | Position numbers for the image descriptions  |
| <b>①</b> / <b>⑫</b> / <b>Ⓐ</b>   | Position numbers for the image descriptions for electrical wires and components as well as coolant hose sections |

## 4 Technical Information

### Dimension specifications

- All dimensions specified in mm
- Perforated brackets and mounting angles are shown to scale
- Observe data regarding scale on the templates

### Tightening torque specifications

- Tightening torque values of 5x13 heater bolts and 5x11 heater stud bolts = 8Nm
- Tightening torque values of 5x15 retaining plate of water connection piece bolts = 7Nm
- 5x12 bolt tightening torque of 2-part heater bracket = 6Nm
- Tighten other bolt connections in accordance with manufacturer's instructions or in accordance with state-of-the-art-technology

### Temperature specification for heat shrink plastic tubings

- Fabric heat shrink tubing: shrink temperature max. 230°C
- Standard heat shrink plastic tubing: shrink temperature max. 300°C

### Necessary special tools

- Hose clamp pliers for auto-tightening hose clamps
- Hose clamp pliers for Clic hose clamps of type W
- Hose clamping pliers
- Hose cutter
- Automatic wire stripper 0.2 - 6 mm<sup>2</sup>
- Crimping pliers for cable lugs 0.5 – 10 mm<sup>2</sup>
- Crimping pliers for male connector 0.14 – 6 mm<sup>2</sup>
- Crimping pliers for connector 0.25 – 6 mm<sup>2</sup>
- Torque wrench for 2.0 - 10 Nm
- Deep-hole marker
- Metric thread-setter kit
- Webasto Thermo Test Diagnosis with current software

## 5 Preparations

### 5.1 Vehicle preparation

Further information can be found in the vehicle manufacturer's technical documentation.

| Vehicle area                | Components to be removed   | Other applicable documents |
|-----------------------------|--|----------------------------|
| General                     | <ul style="list-style-type: none"> <li>▶ Open the fuel tank cap</li> <li>▶ Ventilate the fuel tank</li> <li>▶ Close the fuel tank cap again</li> <li>▶ Depressurise the cooling system</li> </ul>  |                            |
| Engine compartment and body | <ul style="list-style-type: none"> <li>▶ Disconnect the battery</li> <li>▶ Complete air filter with intake hose</li> <li>▶ Water drain chamber cover</li> <li>▶ Windscreen wiper cover</li> <li>▶ Expansion tank</li> <li>▶ Lower engine cover</li> <li>▶ Front wheel on the driver's and front passenger's side</li> <li>▶ Wheel well trim on the driver's and front passenger's side</li> <li>▶ Underride protection on the front passenger's side</li> <li>▶ Bumper trim</li> </ul> |                            |
| Passenger compartment       | <ul style="list-style-type: none"> <li>▶ Rear bench seat on the front passenger's side</li> <li>▶ Open the tank fitting service lid on the front passenger's side</li> </ul>   |                            |

### 5.2 Heater preparation

|                    |  |  |
|--------------------|--|--|
| Engine compartment | <ul style="list-style-type: none"> <li>▶ Remove years that do not apply from the type and duplicate label</li> <li>▶ Attach the duplicate label (type label) in the appropriate place in the engine compartment</li> </ul> |  |
|--------------------|--|--|

## 6 Installation overview

Fig. 1

Legend to installation overview

| Abbreviation | Component                         |
|--------------|-----------------------------------|
| DP           | Fuel pump                         |
| FF           | FuelFix                           |
| HG           | Heater                            |
| SH2          | Fuse holder of engine compartment |
| UP           | Coolant pump                      |

The retrofitting of the parking heater is shown on petrol and diesel vehicles. If there is no separate note, the installation is identical. Special features are mentioned separately.

## 9 Fuel

### DANGER

**Risk of fire and explosion due to leaking fuel and escaping fuel vapours.**

The incorrect installation of the fuel extractor can cause damage and fire.

- ▶ Avoid electrostatic discharges and open fire
- ▶ When working on the fuel system, ensure sufficient ventilation and bleeding
- ▶ Open the fuel tank cap of the vehicle
- ▶ Ventilate the fuel tank
- ▶ Re-close the tank lock
- ▶ Catch any fuel running off with an appropriate container

### Danger of damage to components

- ▶ Install fuel line and fuel pump wiring harness so that they are protected against stone impact
- ▶ Provide rub protection for fuel line and wiring harness in areas where there are sharp edges

### Dismantling fuel pump connector X7

Fig. 31

## 9.1 Routing fuel line

### Connection to heater

- ▶ Draw fuel line **1** and fuel pump wiring harness **3** into 600 long corrugated tube **2**.
- ▶ Attach fuel line with cable ties as shown.
  - 4** Ø10 clamp

Fig. 32

## Routing line

Fig. 33

► Route corrugated tube **1** with fuel line and fuel pump wiring harness in the water drain chamber as shown.

Fig. 34

► Route corrugated tube **2** with fuel line and fuel pump wiring harness in the water drain chamber.

- 1** Edge clip cable tie
- 3** Cable tie

Fig. 35

Remove strut brace **1** (if present).

Fig. 36

► Route corrugated tube **1** with fuel line and fuel pump wiring harness in the water drain chamber.

**2** Edge clip cable tie

Fig. 37

► Route corrugated tube **1** with fuel line and fuel pump wiring harness **1** in the water drain chamber.

► Route fuel line and fuel pump wiring harness **2** to the wheel well.

Fig. 38

► Route fuel line and fuel pump wiring harness **1** through protective rubber plug **2** into the wheel well.

Fig. 39

► Draw fuel line and fuel pump wiring harness **1** into corrugated tube **2** and route them to the fuel pump installation location.

### Copying hole pattern

Fig. 40

Remove underbody protection at position **1**.

**1** Hole pattern

### Inserting rivet nut

- 1 M6x20 bolt, pipe clamp, angle bracket, flanged nut
- 2 Drill out hole to  $\text{Ø}8.5$

## Premounting exhaust pipe a2

Fig. 65

- 1 Premounted angle bracket

## Mounting exhaust pipe a2

Fig. 66

 Danger of damage to components  
► Ensure sufficient distance from neighbouring components, correct if necessary.

► Tighten screw connection at position **3**.

- 1 Hose clamp
- 2 Original vehicle bolt, premounted angle bracket, original vehicle thread

## 11 Coolant for petrol vehicles

### 11.1 Hose routing diagram

Fig. 67

All spring clips without a specific designation  = Ø25

All connecting pipe  or  = Ø18x18

**1** Original vehicle spring clip; **2** Ø18x18x18 T-piece; **3** Ø18x18 non-return valve; **4** Black (sw) rubber isolator

## 11.2 Coolant circuit installation

### Mounting fabric heat shrink tubing

Fig. 68

- ▶ 1. Slide on and cut to length
- ▶ 2. Shrink, use at most 230 °C

1 Fabric heat shrink tubings

### Mounting coolant pump

Fig. 69

- 1 Coolant pump
- 2 Coolant pump mount
- 3 Heater bracket

### Connecting coolant pump wiring harness

Fig. 70

- ▶ Route coolant pump wiring harness 2 as shown and fasten using cable tie 1.

3 Coolant pump wiring harness connector

## Connection to heater inlet

Fig. 71

## Cutting point 1

Fig. 72

► Cut the heat exchanger outlet / engine inlet hose as shown.

► Section **3** will be reused.

- 1** Heat exchanger outlet hose section
- 2** Engine inlet hose section

## Cutting section

Fig. 73

## Cutting point 2

Fig. 74

► Disconnect engine outlet/heat exchanger inlet hose **2**.

- 1** Heat exchanger inlet connection
- 3** Engine outlet connection

## Cutting hose

Fig. 75

► Cut engine outlet/heat exchanger inlet hose as shown.

► Shorten heat exchanger inlet hose section **2** at position **1** by 15mm. The original vehicle spring clip will be re-used.

- 3** Engine outlet hose section

## Premounting hose group with T-piece

Fig. 76

- 1** Engine outlet hose section
- 2** Heat exchanger inlet hose section
- 3** T piece

## Premounting hoses **(H)** and **(J)**

Fig. 77

## Connecting premounted T-piece hose group

Fig. 78

► Route hose **(K)** under the A/C line in the direction of the heater.

- 1** Heat exchanger inlet hose section
- 2** T piece
- 3** Engine outlet hose section

## Routing and fastening hose **(K)**

Fig. 79

- 1** Cable tie

Fig. 80

1 Original vehicle hose bracket

Fig. 85

- 1 18x18x18 T-piece
- 2 25x37 hose bracket
- 3 18x18 non-return valve
- 4 Black (sw) rubber isolator

Fig. 86

Fig. 87

- 1 90°, 18x18 connecting pipe
- 2 Black (sw) rubber isolator

### Mounting premounted non-return valve hose group

Fig. 88

- 1 Heat exchanger outlet hose section
- 2 18x18x18 T-piece
- 3 25x27 hose bracket on A/C line
- 4 18x18 non-return valve
- 5 Engine inlet hose section

## Routing hose **B**

Fig. 89

Danger of damage to components

► Ensure sufficient distance from neighbouring components at position **3**, correct if necessary.

- 1** Cable tie around hose **B** and original vehicle hose
- 2** Cable tie around hose **B** and original vehicle Y-piece

Fig. 90

Danger of damage to components

► Ensure sufficient distance from neighbouring components at position **1**, correct if necessary.

Fig. 91

► Fix hose **B** and original vehicle hose using cable ties **2** and **3** (interlinked).

- 1** Cable tie

## Connecting hoses **B** and **C**

Fig. 92

**1** Position black (sw) rubber isolator

## Connecting coolant pump

Fig. 93

► Fix hoses **C** and **J** using cable ties **1** and **2** (inter-linked).

**3** Coolant pump

## 12 Coolant for diesel vehicles

### 12.1 Hose routing diagram

Fig. 94

All spring clips without a specific designation  = Ø25

All connecting pipe  or  = Ø18x18

**1** Original vehicle spring clip; **2** Ø18x18x18 T-piece; **3** Black (sw) rubber isolator; **4** Ø18x18 non-return valve

## 12.2 Coolant circuit installation

### Mounting fabric heat shrink tubing

Fig. 95

- ▶ 1. Slide on and cut to length
- ▶ 2. Shrink, use at most 230 °C

**1** Fabric heat shrink tubing

### Mounting coolant pump

Fig. 96

- 1** Coolant pump
- 2** Coolant pump mount
- 3** Heater bracket

### Connecting coolant pump wiring harness

Fig. 97

- ▶ Route coolant pump wiring harness **2** as shown and fasten using cable tie **1**.

**3** Coolant pump wiring harness connector

## Connection to heater inlet

Fig. 98

## Cutting point 1

Fig. 99

► Cut the heat exchanger outlet / engine inlet hose as shown.

► Section **3** will be reused.

- 1** Heat exchanger outlet hose section
- 2** Engine inlet hose section

## Cutting section

Fig. 100

## Shortening engine outlet/heat exchanger inlet hose

Fig. 101

- ▶ Disconnect engine outlet/heat exchanger inlet hose **1** from heat exchanger inlet and shorten by 15mm as shown.
- ▶ Reconnect engine outlet/heat exchanger inlet hose **1** at the connection point.

## Cutting point 2

Fig. 102

- ▶ Cut engine outlet/heat exchanger inlet hose as shown.
  - 1** Engine outlet connection
  - 2** Heat exchanger inlet connection

## Premounting hose group with T-piece

Fig. 103

- 1** T piece
- 2** Black (sw) rubber isolator

## Connecting premounted T-piece hose group

Fig. 104

► Position black (sw) rubber isolator **4** as shown.

- 1** Engine outlet hose section
- 2** T piece
- 3** Heat exchanger inlet hose section

## Premounting hose group with non-return valve

Fig. 105

- 1** 18x18x18 T-piece
- 2** Black (sw) rubber isolator
- 3** 18x18 non-return valve
- 4** 13x22 hose bracket

## Mounting hose **B** onto hose group with non-return valve

Fig. 106

## Mounting premounted non-return valve hose group

Fig. 107

- 1 Heat exchanger outlet hose section
- 2 18x18x18 T-piece
- 3 Engine inlet hose section

## Fastening hose A to original vehicle vacuum line

Fig. 108

Danger of damage to components

- Ensure sufficient distance from neighbouring components at position 2, correct if necessary.

- 1 Original vehicle vacuum line
- 3 13x22 hose bracket between hose A and original vehicle vacuum line

## Routing hose B

Fig. 109

- 1 23x25 hose bracket between original vehicle hose and hose B
- 2 Cable tie

Fig. 110

► At position **1**, mount 23x25 hose bracket **2** between hose **B** and original vehicle hose.

### Connecting hoses **B** and **C**

Fig. 111

**1** 23x25 hose bracket between hose **B** and engine outlet hose section

### Connecting coolant pump

Fig. 112

**1** Coolant pump

## 13 Final work in engine compartment

### Preparing perforated bracket

Fig. 113

### Preparing horn

Fig. 114

- 1 Original horn
- 2 Remove nut, discard bracket
- 3 Horn, prepared perforated bracket, tighten nut

### Mounting horn

Fig. 115

- 1 Original vehicle bolt, premounted horn, original vehicle thread

## Adapting wheel well trim

Fig. 116

- 1 Wheel-well inner panel
- 2 Remove perforated cover
- 3 Opening

- ▶ Mount wheel-well inner panel.
- ▶ Position exhaust pipe **a2** in the centre of original vehicle opening **3**.

Danger of damage to components

- ▶ Ensure sufficient distance between exhaust pipe **a2** and neighbouring components, correct if necessary.

## 14 Electrical system of passenger compartment

### 14.1 Air-conditioning control

Integrate the air-conditioning control as per the separate installation documentation:

'Webasto Comfort' air-conditioning control installation documentation for AAC of BMW 3 Series / 5 Series / X3 / X4

## 15 Electrical system of control elements

### 15.1 Remote option (Telestart)

#### Premounting receiver

Fig. 117

Observe the Telestart installation documentation.

► Bend receiver bracket **2** as shown.

**1** Receiver

#### Mounting receiver

Fig. 118

**1** M5x16 bolt, large diameter washer, original vehicle hole, Telestart bracket, flanged nut

**2** Receiver

#### Mounting temperature sensor, only in case of T100 HTM

Fig. 119

► Fasten temperature sensor **1** using double-sided adhesive tape.

## Mounting aerial

Fig. 120

**1** Aerial

## 15.2 ThermoCall option

### Mounting receiver

Fig. 121

Observe the ThermoCall installation documentation.

► Fasten receiver **1** using double-sided adhesive tape.

### Mounting aerial (optional)

Fig. 122

**1** Aerial

## 16 Final Work

Further information can be found in the vehicle manufacturer's technical documentation.

- ▶ Mount removed parts in reverse order.

- ▶ Check all hoses, clamps and all electrical connections for firm seating.
- ▶ Insulate and tie back loose lines
- ▶ Spray heater and electrical components with anti-corrosion wax (Tectyl 100K).
- ▶ Connect the battery.

**Only use manufacturer-approved coolant.**

- ▶ Fill and bleed the coolant circuit according to the vehicle manufacturer's specifications.

Further information can be found in the general installation and operating instructions of the Webasto components.

- ▶ Program MultiControl CAR, teach Telestart transmitter
- ▶ If the fan function or A/C control panel settings need to be checked, see the installation documentation in the additional kit 'Webasto Comfort' A/C control, section 'Final work'
- ▶ Initial start-up and function check
- ▶ Affix 'Switch off parking heater before refueling' caution label in area of filler neck

**Vehicle event log after parking heating mode**

- ✓ Components of the original vehicle air conditioning system are activated during parking heating mode. Other vehicle components remain inactive, which in some circumstances may be interpreted as an error and can be filed as such in the event log. An increased power consumption (quiescent current) may also be registered for some vehicles.
- ▶ If an incorrect installation can be excluded, these entries are exclusively related to the parking heating mode situation and have no effect on the vehicle functions in driving mode.

These are the original instructions. The German language is binding.  
You can request your language if it is missing. The telephone number of each country can be found in the Webasto service centre leaflet or the website of the respective Webasto representative of your country.
