| 9027525C | Heater AT Evo 40 D 12V Ambulance |
| 9027526D | Heater AT Evo 55 B 12V Ambulance |
| 9027527D | Heater AT Evo 55 D 12V Ambulance |

New configuration:

- Software Tool „Wbup_date“ V1.10 is used for update
- It is necessary to rename the Update program from .txt to .exe

Please note while flashing

- It is not allowed to interrupt the power supply!
→ otherwise the ECU will get damaged and has to be substituted
- The power supply has to be proper
→ use a power supply 12/24V / >10A or well charged 12/24V battery
- Close all other programs (Office...) and stop background tasks (network connections, anti-virus software, screen saver...)
- Check proper installation of all electrical connections

**Please note:
flashing only with USB**

Which new / changed functions include the update

- new parameter set for failure F97h
